School of Social Work, University of Washington

The 290 organizers, participants, facilitators, and supporters who
contributed ideas and time to the study

The May 2000 Practitioner Advisory Focus Group participants

In 1998, the Charles Stewart Mott Foundation gave a grant to the Topsfield Foundation for a study of best practices in community-wide study circle programs. The Topsfield Foundation selected Roberts & Kay, Inc. (RKI) to undertake this study; RKI then formed a diverse, four-person team to conduct the research. Other publications based on this research can be obtained from the Topsfield Foundation/Study Circles Resource Center.

Chapter I: Executive Summary 1

Creating a broad-based, diverse organizing coalition 5

Recruiting and training a diverse group of facilitators 5

Recruiting participants 6

Contributing to change 7

Linking study circles with change efforts 9

Assessing the effectiveness of study circles as a tool for addressing racism 11

Understanding the impact of topic 12

Chapter II: Key Findings 15

A. Programs adopted the study circle dialogue sessions as developed by SCRC 17

 Best practices for study circle dialogue sessions 19

B. Programs used local knowledge to adapt the community-wide organizing model 20

 Best practices for community-wide organizing 22

C. Programs experimented with different approaches to linking dialogue with action 26

 Promising practices for linking dialogue with action 27

D. Organizers and participants lacked agreement about whether and how to use study circles to take action on institutional racism 29

 Implications of the different points of view about study circles as a tool for addressing institutional racism 31

E. The Best Practices study raised several additional issues concerning the link between dialogue and action 33

Chapter III: Background and Introduction to the Study 37

A. Origins of the study 39

B. Background of the community-wide approach to study circles 41

C. The “best practices” nature of the study 44

D. Premises guiding this Best Practices study 45

 1. A focus on usefulness 45

 2. A concentration on community-wide programs 45

 3. A “key informant” role for organizers 46

 4. A commitment to joint learning about what works rather than an arms-length evaluation 46

 5. A framework of democratic dialogue and deliberation 47

Toward Competent Communities: Best Practices for Producing Community-Wide Study Circles

6. A particular concentration on race and racism	47
7. A reliance on qualitative methods	48
E. Presumptions and questions about study circles that underlie this study	49
1. Study circles are valuable	49
2. Individual dialogue sessions are similar in different communities	49
3. Implementation of the community-wide model varies according to community contexts and decisions	50
4. Whether study circles are effective in addressing racism is an inquiry central to the study	51
F. Introduction to key terms	53
G. The main research questions underpinning this study	56
H. Introduction to the 17 learning sites	58
Chapter IV: Summary of Program Characteristics and Strategies	67
A. Background factors	69
1. What topics did the study circles address?	69
2. What was the main reason people in the learning sites organized to produce study circles?	70
3. What are the missions or goals of the study circle programs in the 17 learning sites?	71
4. Did study circle programs in the learning sites use pilot study circle rounds?	72
5. How many rounds of study circles have taken place in the 17 learning sites?	72
6. Are study circles an ongoing effort in the 17 learning sites?	73
B. Organization factors	74
1. How did the programs in the 17 learning sites structure their coalitions?	74
2. How many coalition/board members had direct experience with study circles?	75
3. What was the race and gender of the people who initiated study circle programs in the 17 learning sites?	75
4. What was the race and gender of the key decision makers in the 17 learning sites?	76
5. How diverse were the working groups of coalition members in the 17 learning sites?	76
6. How did the programs in the 17 learning sites carry out the work of organizing the effort?	77
7. What organizational structures served as the base for study circles?	78
8. What sources of funding sustained study circle programs in the 17 learning sites?	79

9. What kinds of relationships did study circle programs in the 17 learning sites have with media in their communities?	80
C. Participation factors	81
1. How many people have participated in study circles in the 17 learning sites?	81
2. To what extent did the racial and ethnic diversity among participants reflect that of the communities hosting the study circles?	81
3. To what extent did study circle organizers in the 17 learning sites use explicit strategies to make individual study circle groups as diverse as possible, and to what extent did they succeed?	82
4. Where did study circles take place?	82
D. Facilitator factors	84
1. How do study circle organizers recruit facilitators, and where do they look for good ones?	84
2. Did study circle programs in the 17 learning sites use cofacilitators?	85
3. How diverse was the facilitator pool compared to the diversity in the study circle community?	85
4. How extensive was the investment in facilitator training in the 17 learning sites?	86
5. Did the facilitator training programs address race specifically in the 17 learning sites?	86
6. What kinds of support did organizers and trainers provide for facilitators during the course of study circle sessions?	87
E. Action-change factors	88
1. How did study circle programs in the 17 learning sites design, describe, and promote a relationship between dialogue and action?	88
2. Did programs in the 17 sites use action forums to promote study circle participants' involvement in action following the dialogue sessions?	89
3. Was action or change either an explicit goal or an expected and welcomed outcome?	90
4. What was the primary target for expected action and change — individuals, organizations, or communities and institutions?	90
5. What mechanisms did study circle organizers build to link dialogue to action, and how well have these mechanisms been sustained?	91
6. How many of the study circle programs in the 17 learning sites communicate regularly in writing with study circle participants and allies?	92
Chapter V: Creating a Broad-Based, Diverse Organizing Coalition	95
A. Key leaders	98
1. Pay conscious attention to key initiators	99
2. Identify and recruit key decision makers	103

Toward Competent Communities: Best Practices for Producing Community-Wide Study Circles

3. Recruit and utilize key administrators	104
4. Utilize people with key marketing and promotional skills	106
B. Central organizing body	108
1. Reach out early and often to a broad base of community leaders and organizations	108
2. Build on existing networks	113
3. Be clear about commitment and expectations	115
4. Incorporate new individuals and organizations as study circles proceed	116
5. Make changes to the central organizing body when necessary	116
C. Community partners/sponsors	119

Chapter VI: Recruiting, Training, and Supporting a Diverse Group of Facilitators

125

A. Strategies for specifically recruiting a diverse group of facilitators	127
1. Set goals for diversity	127
2. Rely on coalition members to recruit for diversity	128
3. Recruit from organizations with diverse members or a diversity-oriented mission	129
4. Recruit from study circle participants	130
5. Use multiple forms of appeal and promotion	130
B. Other strategies for recruiting potential facilitators	132
1. Recruit from organizations that have members with expertise	132
2. Use personal contact	133
3. Recruit and train young people	135
C. Techniques for providing quality facilitator training	136
D. Mechanisms for developing supportive and evaluative structures to strengthen facilitation	140
1. Arrange for cofacilitators	140
2. Plan and implement quality control	141
3. Provide ongoing supportive activities	143
4. Involve facilitators in design and organizational tasks	145

Chapter VII: Recruiting Participants

149

A. Building on the organizing coalition's existing affiliations	151
1. Focus on groups that are part of the coalition	152
2. Rely on leaders or other individuals who are part of the coalition	153

B. Working to recruit participants from groups not affiliated with study circles 155

- 1. Make appeals or offer “sample” experiences to leaders of organizations or community groups not yet involved with the coalition 155
- 2. Demonstrate to organizations how study circles fit with their mission or goals 156
- 3. Hire persons with recruiting expertise 158
- 4. Recruit on a one-on-one basis 158

C. Creating a high profile for study circles through media and events 159

- 1. Work with media 159
- 2. Produce kick-off events 163

D. Keeping track of participants and maintaining good databases 166

E. Adding appeal, reducing uncertainty, and removing barriers to participation 168

- 1. Choose a topic that fits and attracts interest 168
- 2. Offer a taste of the experience to reduce uncertainty 169
- 3. Use languages other than English 171
- 4. Select a location that works 171
- 5. Provide incentives 172

F. Using multiple recruitment strategies 174

Chapter VIII: Contributing to Change 177

A. The ways study circles contributed to change 179

- 1. Ways study circles contributed to changes in people 179
- 2. Ways study circles contributed to changes in organizations 183
- 3. Ways study circles contributed to changes in communities and institutions 188

B. Types of changes related to race 200

- 1. Improving race relations by increasing awareness or preparation for action 200
- 2. Improving race relations by taking action 203
- 3. Increasing awareness and preparing for action toward ending racism 208
- 4. Taking action toward ending racism 211

Chapter IX: Linking Study Circles with Community Change Efforts 219

A. Specific tools to link study circle dialogue sessions with change efforts 222

- 1. Organizers developed tools that initiated change efforts and built long-term citizen capacity 223
- 2. Some organizers developed tools aimed at sustaining study circle work on action 233

Toward Competent Communities: Best Practices for Producing Community-Wide Study Circles

B. Across communities, a strong commitment to positive change, and different pathways to accomplish it	237
1. The critical mass pathway	238
2. The informed citizen pathway	241
3. The highly visible event pathway	243
4. The workplace pathway	245
5. The leadership pathway	246
6. The governance and policy pathway	249
7. The multilevel pathway toward ending institutional racism	250

Prologue to Chapters X and XI 253

Chapter X: Assessing the Effectiveness of Study Circles as a Tool for Addressing Racism 255

A. Introduction	257
B. Assessing the merits of different elements of the small group conversations	260
1. Participants and organizers identified several elements of the small group conversations that contributed to study circles' effectiveness as a tool for addressing racism, particularly on a personal level	260
2. Participants and organizers cited several aspects of the small group conversations that diminished study circles' capacity to address racism, particularly on an institutional level	277
C. Assessing the effectiveness of actions linked with study circles	287
1. Some people — typically organizers — suggested that study circles could address racism effectively through the actions and changes that occurred after the small group conversations	288
2. Some people suggested that even the action-oriented component of study circles did not sufficiently address racism on an institutional level	293
D. Assessing the overall effectiveness of study circles as a tool for addressing racism	299
1. The majority of people considered study circles to be most effective as a tool for addressing racism on a personal level	299
2. With some noteworthy exceptions, most people considered study circles to be less effective as a tool for addressing racism on an institutional or societal level	309
E. Conclusion	312

Chapter XI: Understanding the Impact of the Study Circle Topic 315

A. The impact of the study circle topic on study circle programs’ effectiveness in addressing racism 320

 1. People had mixed views on whether the study circle topic of race addresses racism most effectively 320

 2. People often disagreed on whether the topic of race includes people of all racial and ethnic backgrounds or instead focuses exclusively on European Americans/whites and African Americans/blacks 335

 3. Some people implied that the way the study circle topic of race is stated may impact differently on participants’ expectations 340

B. The impact of the study circle topic on participation by people of different racial and ethnic backgrounds 344

 1. Participants and organizers suggested that the topic of race has both positive and negative impacts on participation by people of different racial and ethnic backgrounds 344

 2. People named a wide variety of topics other than race that may achieve greater participation by people of different racial and ethnic backgrounds 351

C. Conclusion 355

Appendix A: About Best Practices Team Members 357

Appendix B: Methodology 361

A. Developing the research framework 363

 1. The research team 363

 2. The research questions 363

 3. The 17 learning sites 364

B. Primary research methods 367

 1. Written materials 367

 2. Observation 368

 3. Individual interviews 368

 4. Small group interviews 368

 5. Focus groups 368

 6. Community tours 369

 7. Site visit summaries 369

 8. Thick descriptions 370

 9. Site analysis charts 370

 10. Shared draft 370

 11. Advisory groups 370

 12. Completion 371

Appendix C: Demographics 373

Appendix D: Information Regarding Research and Interview Questions 385

A. First set of research and interview questions 387

B. Revised research and interview questions 390

C. Questions for facilitators (used in Aurora facilitator focus group) 394

D. Moderators’ agenda for study circle participants: Best Practices Winter 2000
focus groups on RQ6 and RQ7 (used in Syracuse and Hartford) 395

E. Moderators’ agenda for study circle organizers: Best Practices Winter 2000
focus groups on RQ6 and RQ7 (used in Hartford and Syracuse) 400

F. Moderators’ agenda for Maine organizer focus group (May 27, 1999) 404
